

Manufacturers face a long list of challenges that require operational focus, strategic planning, and precise execution. Serving the industry for over 50 years, our team has gained an in-depth knowledge of manufacturers and their processes. Understanding how each manufacturer designs, makes, and markets its product enables us to be particularly effective in consulting with our clients.

We provide a variety of services to help your manufacturing business achieve improved efficiencies, including:

- Inventory accounting and management
- Process and operational efficiency analysis
- Cash flow forecasts and projections
- Capital budgeting and analysis
- Capacity management and growth planning
- Assistance with cost accounting systems
- Tax planning and compliance, including multi-state filings
- Research & experimentation tax credit
- State, local, and property tax issues
- Audit and assurance services
- Business valuation
- Succession planning
- Mergers and acquisitions
- Lease/buy analysis
- Employee benefit plan design and implementation
